

The following space group symmetry diagrams are for primitive (P) orthorhombic space groups. For each write down the symmetry axis (either 2 or 2_1) that is parallel to each major axis, and give the symmetry plane (a , b , c , n , or m) that is normal (perpendicular) to each. Give the simplified Hermann-Mauguin symbol for the space group. In each figure, a is vertical, b horizontal, and c normal to page.

1

	axis	plane
a	_____	_____
b	_____	_____
c	_____	_____
H-Msymbol	_____	
Point Group	_____	

2.

	axis	plane
a	_____	_____
b	_____	_____
c	_____	_____
H-Msymbol	_____	
Point Group	_____	

3.

	axis	plane
<i>a</i>	_____	_____
<i>b</i>	_____	_____
<i>c</i>	_____	_____
H-Msymbol	_____	
Point Group	_____	

4.

	axis	plane
<i>a</i>	_____	_____
<i>b</i>	_____	_____
<i>c</i>	_____	_____
H-Msymbol	_____	
Point Group	_____	

5.

	axis	plane
<i>a</i>	_____	_____
<i>b</i>	_____	_____
<i>c</i>	_____	_____
H-Msymbol	_____	
Point Group	_____
